

Horticulture

For the green-fingered out there, studying at Landmarks College is the perfect start to a career in horticulture.

The College provides the opportunity to study a broad range of specialisms, including practical and theory-based work as well as 'on the job' training. Our students learn about the tools of the trade - both powered and non-powered tools and equipment, in addition to plant identification, landscape maintenance and working with local businesses to offer locally sourced food solutions.

This course can be followed with or without a formal qualification and will be engineered around the needs of the individuals.

Landmarks has a dedicated farm, local allotments and employers which help to expand a learners experience working in horticulture.

We are also committed to providing locally sourced food solutions to local businesses and this also provides excellent opportunities for students to grow and sell produce to our local community.

Learners will undertake practical tasks that seek to improve communication and confidence skills, as well as work ethic.
